jonathan.i.hagen@gmail.com   *8805 El Rey Blvd*
(512) 436-3140   Austin, TX 78737

Objective	Utilize my leadership and computer science knowledge to make significant contributions and advancements at a technology-driven company through an internship or full-time job.

Work   *Aspyr Media*   *Austin, Texas*   *July '16 - June '17*

Software Quality Assurance Tester
I reported to the QA Manager and Director of Support Services. Working within a team of individuals testing all aspects of Aspyr Media software. Leading project teams during test execution and critical issue discovery. Creating and maintaining test cycles along with logging issues/tasks on the **Jira** bug tracking system. Using spreadsheets for documentation and issue analysis. Working closely with development engineers in order to reproduce issues reliably and get timely issue closure. Participating in weekly status meetings. Working overtime on critical time-sensitive software releases.

School Projects

Web development with **HTML / CSS / JavaScript**	Database Applications
Programming in **C / C# / C++ / Java**	.Net Concepts
Computer Networking	Business Communication
Security Operations	Data Structures

Skills
